High Speed High Torque Vane Motor 25HM, 26HM Series

Features and Handling

High speed and high-pressure motors ranging from 29.0 to 193.2 cm3/r with 172 bar of maximum pressure and 10 torques rating choices. The internal inlet chambers are equally and diametrically opposed resulting in balanced in radial loads.

Thus, the motors are hydraulically balanced which reduced wear and heat from friction.

These motors provide 90% efficiency due to dual pressure plates, which produced low internal leakage. Motors are bi-rotational, simply reversed by reversing in flow direction.
